

## PATENT CLAIMS

1. The use of natural polymer in expanded form, with added odour and/or taste additive which attracts fish, to bait or fish feed.
2. The use of natural polymer according to claim 1, where the natural polymer is a biopolymer and preferably starch.
3. The use of natural polymer according to claim 2, where the starch is preferably maize or rice starch.
4. The use of natural polymer according to claims 1-3, where the natural polymer is in the form of pieces or pellets before expansion.
- 10 5. The use of natural polymer according to claim 4, where filler is added to the natural polymer.
6. <sup>WY</sup> The use of natural polymer according to claims 1-5, where the odour and/or taste-producing additive which attracts fish is added to the pieces or pellets.
- 15 7. <sup>WY</sup> The use of natural polymer according to claims 1-5, where the odour and/or taste-producing additive which attracts fish is added during expansion.
8. <sup>WY</sup> The use of natural polymer according to claims 1-5, where the odour and/or taste-producing additive which attracts fish is added in expanded form.
